SR:0.30 E:0.79 SRI:27

CHAMPAGNE
SR:0.38 E:0.80 SRI:38

COPPER PENNY
SR:0.49 E:0.85 SRI:55

Notes:

The colors above are representative and may vary slightly from actual colors. Prior to making final selections, please request actual color chip samples. SR stands for Solar Reflectivity and is the ability of a material to reflect solar energy back into the atmosphere. E stands for Emissivity and is the ability of a material to release absorbed energy back into the atmosphere. SRI represents Solar Reflective Index and is a measure of the material's ability to reject solar heat considering reflectance, emissivity and convection. All information is subject to change without notice. Please reference our web site for the most current data.
